

What is the Minority Engineering Advancement Program (MEAP)?

The Minority Engineering Advancement Program (MEAP) is a pre-college outreach that was designed to identify underrepresented students who are talented in mathematics and science and then introduce them to exciting educational opportunities in engineering and technology related fields. MEAP familiarizes students with engineering and technology prerequisites that help in middle school and high school preparation for entrance into a college or university when pursuing a technical track.

MEAP is held in the summer months as a daytime program engaging underrepresented youth in engineering and technology activities. MEAP also introduces students to successful role models from industry and educational fields who serve as mentors. In addition to exposure of industrial settings, interaction with faculty and staff, MEAP includes a focus on computer instruction in the areas of hardware, software and graphics. Activities held on the IUPUI campus, downtown Indianapolis. www.engr.iupui.edu/meap

2017 MEAP Summer Dates

Monday June 19 – Friday June 23, 2017

This workshop is for high school students in grades 9, 10 and 11 at the time of school semester application. These students will have completed the 9th, 10th or 11th grade by the summer dates.

Monday June 26 – Friday June 30, 2017

This workshop involves 7th grade students and 8th grade students at the time of school semester application. These students will have completed the 7th or 8th grade by the summer dates.

Please email summer.meap@gmail.com
to enquire about additional opportunities for underrepresented students
