

**DEPARTMENT OF MECHANICAL ENGINEERING, IUPUI
FACULTY FEEDBACK FORM FOR COURSE OUTCOMES SURVEYS**

Note: This form is to be completed and submitted to the department by instructors at the end of each semester based on the survey results of courses taught. It is designed to monitor student learning, keep track of progress and changes made in the program, and allow faculty reflect upon the results. The survey results may be viewed from the department's survey database at <http://www.engr.iupui.edu/me/assessment/fsurveys.shtml>. The completed form is to be emailed to hakay@iupui.edu (note: first save the file locally then email as an attachment).

Course: ENGR 196 (008116)	Year: 2006	Semester: Fall
Instructor: Peter O. Orono	Survey Average: 3.79 (Out of 5)	Faculty Average: 4.25 (Out of 5)

1. List the outcomes that did not meet the Department's current threshold of 3.75 out of 5.0 and explain the reasons. If all or most outcomes in your course are equal to or above 3.75, please reflect upon on the lowest two or three. Please state the outcomes as fully as possible, as in the course outcomes list, with the numbers same as on the list.

Most of the outcomes met the threshold of 3.75. The overall average (3.79) was less than the Spring 2006 of 4.05.

4. Construct simple electrical circuits in an electrical hardware laboratory.[b] Avg. 3.33.

This was better than spring 2006 Avg. of 3.17.

This could be improved by allocating additional time for lab work in electrical circuits.

5. Write short project reports according to specified instructions. [g]. 3.17. This was lower than spring 2006 Avg. of 3.62.

This could be improved by providing written instruction for reports and focusing on each report before the due date.

2. Were there any changes made to the course during the semester? If so, explain.

Matlab section of the course was removed from ENGR 196 and moved to ENGR 297. ENGR 297 will be offered starting Spring 2007. I taught 4 courses during the semester instead of 3 normally taught.

3. Are there any recommendations for improvement?

See item 1. above.

4. Additional reflections/suggestions for assessment?

Please email to: hakay@iupui.edu. Thanks.
