

**DEPARTMENT OF MECHANICAL ENGINEERING, IUPUI
FACULTY FEEDBACK FORM FOR COURSE OUTCOMES SURVEYS**

Note: This form is to be completed and submitted to the department by instructors at the end of each semester based on the survey results of courses taught. It is designed to monitor student learning, keep track of progress and changes made in the program, and allow faculty reflect upon the results. The survey results may be viewed from the department's survey database at <http://www.engr.iupui.edu/me/assessment/fsurveys.shtml>. The completed form is to be emailed to cwooton@iupui.edu (*note: first save the file locally, then email as an attachment*).

Course: ME 262 Lab	Year: 2007	Semester: Spring
Instructor: Latif Razak	Survey Average: 3.90 (Out of 5)	Faculty Average: 3.75 (Out of 5)

1. List the outcomes that did not meet the Department's current threshold of 3.75 out of 5.0 and explain the reasons. If all or most outcomes in your course are equal to or above 3.75, please reflect upon on the lowest two or three. Please state the outcomes as fully as possible, as in the course outcomes list, with the numbers same as on the list.

Apply vector algebra and complex number methods for motion study of linkages and mechanisms. [a3]

-Reason: Lack of ample time for course instructor to present material for student to relate to Project 3 that involves the said methods. Lab instructor could only recap basics since i) There were little or no requests to repeat material extensively. ii) The gap between material presentation and date of assignment of project was short for students to digest the information*

Make analysis-based design decisions to select mechanism types and dimensions. [e]

-Reason: (Same as above)

*Short time gap was due to schedule changes due to campus closure due to inclement weather. Although lab sessions were on schedule, the inability to present the course material in a timely manner in the lecture component resulted in projects being assigned with time for completion shorter than usual and with students having minimal knowledge about the subject matter.

2. Were there any changes made to the course during the semester? If so, explain.

Instructor change during the 6th week of the semester

3. Are there any recommendations for improvement?

No

4. Additional reflections/suggestions for assessment?

No

Please email to Courtney Wooton at cwooton@iupui.edu. Thanks.
