To graduate school or not to graduate school?

Before making the decision to pursue graduate or professional school, you need to consider your goals and priorities. Do you want to gain additional knowledge and skills in your field? Are you interested in pursuing a career in academia or research? Or do you prefer working in industry and applying your skills in a practical setting? To help you make this decision, we have created a checklist of questions to consider:

- Do I have a career goal that would benefit from additional education?
- Am I prepared to handle the financial burden of graduate school?
- Have I considered alternative career paths that may be more suitable for me?
- How will a graduate degree impact my job prospects?

In the end, the decision to attend graduate or professional school is yours. It is important to carefully consider your own goals and priorities before making a decision. 

- Am I applying to graduate school to secure the job I want? Or are there other goals I want to achieve through attending graduate school?

You need to weigh the benefits of graduate school against the costs and time commitment. Consider the potential long-term career benefits, as well as the personal value you will gain from attending graduate school.

Geographical Preference

Your career goals and potential job opportunities are important factors to consider when choosing a graduate or professional school. You should look for programs in areas that align with your career aspirations and job market trends.

Faculty / Research with Match

Once you have identified a program that aligns with your goals and interests, you can begin the application process. Make sure to review the program requirements carefully and submit all necessary documents on time. Good luck on your graduate or professional school journey!
