
Bill Shogren, Chief Engineer of Advanced Electronic Controls
Delphi Corporation

Thursday, February 24, 2011, 12:00PM-1:00 PM
SL 165 (723 West Michigan Street)

ABSTRACT

This presentation will explore the current state of the art of active safety systems, including a high-level look at sensing systems and the features they enable. The presentation will also discuss several areas that new research is needed to advance the state of the art.

BIOGRAPHICAL SUMMARY

Bill Shogren is the Chief Engineer of Advanced Electronic Controls at Delphi Electronics and Safety. Mr. Shogren has held this position since 2000. His prior experience includes development and implementation of vehicle architecture, vehicle displays, and control systems. Mr. Shogren received his BSEE from Pennsylvania State University in 1981.
